

A diagram showing a 2D hexagonal lattice of nodes. Three red cylinders are placed on the nodes, connected by blue dashed lines. The cylinders are arranged in a zig-zag pattern across the lattice.

A 3D perspective diagram showing a yellow rectangular plate with three circular holes. Below it are three green rectangular blocks, each with a circular hole. Three green vertical pins are shown, each passing through a hole in the top plate and a hole in one of the green blocks. Blue dashed lines with arrows at the bottom indicate the vertical alignment of the pins with the holes in the top plate.
